

Results-driven Business Analyst with 5+ years of experience in enterprise transformation, business requirements analysis, and large-scale digital initiatives across global organizations and financial services environments. Proven expertise in eliciting, synthesizing, and translating complex business needs into clear, actionable requirements—including functional specifications, process flows, workflow diagrams, and use cases. Skilled bridge between business stakeholders, SMEs, technology teams, and vendors with demonstrated ability to maintain end-to-end traceability from discovery through delivery and validation. Proficient in process documentation, change management, and senior-level business communications. MBA Candidate (Business Analytics) seeking Business Analyst role to drive strategic transformation initiatives and deliver high-caliber solutions that empower organizational vision.

EDUCATION:**New York Institute of Technology University – Vancouver, BC****2025- Present**

- Master of Business Administration (MBA)- Concentration in **Business Analytics**

University of West of Scotland – SCQF Level 9**2023**

- Bachelor of Arts in International Business & Finance

Cambridge Advanced & Ordinary Level Certifications

- OKI International School – Colombo, Sri Lanka

WORK EXPERIENCE:**Business Systems & Finance Consultant****Jun 2024 – Aug 2025****EY GDS – Colombo, Sri Lanka**

Consulted with global EY engagement teams (U.S. & U.K.) on technology strategy, process transformation, and implementing digital solutions to enhance operational efficiency.

- **Requirements Analysis & Synthesis:** Elicited complex business needs from global EY engagement teams (US & UK), synthesizing stakeholder input into clear, actionable functional requirements, business specifications, and design recommendations for SAP S/4HANA transformation initiatives.
- **Process & Workflow Documentation:** Documented current-state and future-state workflows across ERP operations and investment functions; identified dependencies, handoffs, and system interactions; created process flow diagrams and end-to-end traceability matrices linking requirements to design decisions and implementation outcomes.
- **Business & Stakeholder Communication:** Bridged business users, technical SMEs, and vendor support teams throughout delivery lifecycle; clarified ambiguity through structured discovery sessions; translated high-level vision into implementable functional specifications and SOPs; delivered senior-level business documentation and governance presentations.
- **Design & Validation Support:** Collaborated on functional design discussions; ensured business intent was clearly articulated; supported test scenario creation and validation to confirm delivered solutions met documented requirements; coordinated project streams and associated stakeholders for alignment.

Senior Associate- Operations (Finance and BA)**Jun 2022 – May 2024****WNS Global Services – Colombo, Sri Lanka**

Authored and maintained comprehensive business documentation (SOPs) and functional requirements, ensuring clear communication between technical teams and business stakeholders.

- **Operated as ERP helpdesk intake owner** for 15+ markets- triaged, categorized, and dispatched reporting and system issues to the correct team or vendor within a Jira-based ticketing workflow, maintaining 98%+ on-time resolution rate.
- **Multi-Market Requirements Management:** Conducted discovery workshops and stakeholder interviews across 15+ markets; synthesized diverse regional needs into standardized requirements; validated alignment to scope and design direction through structured requirements traceability documents.
- **Process Transformation & Documentation:** Reengineered 6 end-to-end reporting workflows, translating complex ERP-driven processes into clear, step-by-step documentation (SOPs); created process flow diagrams, workflow visualizations, and functional specifications; reduced onboarding time by 15%.

- **Issue Analysis & Problem Solving:** Identified and analyzed 12+ recurring system and process issues through comprehensive ticket trend analysis, root cause investigation, and impact assessment; recommended process improvements and controls; enabled proactive fixes preventing escalations.
- **Cross-Functional Stakeholder Alignment:** Acted as primary communication bridge between UK/EU business stakeholders and backend operations teams; clarified ambiguous requirements; set expectations on resolution timelines; maintained transparent status communication to governance and leadership.

Associate- Accounting & Finance

Dec 2019 – Aug 2021

National Lanka Finance PLC, Colombo

- Conducted internal compliance audits and resolved financial discrepancies, improving workflow accuracy and ensuring regulatory
- **Financial Operations Analysis:** Conducted business process analysis across GL accounting, AP/AR reconciliation, and financial reporting workflows using SAP S/4HANA; identified efficiency gaps and compliance requirements.
- **Control & Compliance Documentation:** Documented internal compliance audit procedures, control requirements, and financial process controls; resolved discrepancies; ensured regulatory adherence with zero audit findings over 18 months.
